

HÖGTALARE

THE WORLD'S MOST DYNAMIC WIRELESS HI-FI SPEAKER

Few wireless speakers resonate with music lovers like the Morel Högtalare. Drawing its mechanical design from a purely acoustical approach, the Högtalare is not an overly compact, digitally manipulated speaker system made to sound artificially big. Instead, Morel engineered the cabinet to perfectly complement its powerful 6" woofer and two high-resolution tweeters to deliver sound effortlessly, so music is dynamic and lifelike with rich, natural bass. It's the BT speaker designed to satisfy the audiophile in all of us.

The simple yet modern design of the Morel Högtalare gives it the proper proportions to integrate seamlessly into any living space atop a shelf or mounted to a wall. The Högtalare is also proportioned to fit perfectly into any IKEA Kallax shelving system - the only true hi-fidelity speaker of its kind.

Custom transducers were developed for the Högtalare using 1" soft dome tweeters and 6" high power woofer deliver highly dynamic and rich sound.

A discrete 3-Channel amp was engineered to drive the Högtalare to its fullest potential, producing over 80W RMS.

The Högtalare is a stereo speaker, using two 1" high-resolution tweeters and one dual voice coil woofer.

Transform the Högtalare to a wifi speaker. Simply plug in Chromcast or similar device into the USB port at the back.

A DSP was integrated to fine tune the sound performance of the Högtalare.

3.5mm auxiliary input offers option to connect other sources.

True Wireless Stereo (TWS) enables wireless pairing of a second unit in BT mode. This enables you to significantly increase output while maintaining stereo image.

The Högtalare was designed with removable grilles that are offered in different colors. Grilles can be bought separately.

The Högtalare speaker uses the latest Wireless BT technology to ensure quick wireless connection and high-quality wireless transmission.

aptX sound streaming technology enables streaming high-resolution sound without compromising on sound quality.

The Högtalare can be mounted to a wall using a special wall bracket. Sold separately.

Compact design for easy integration. Dimensions (WxHxD) 12.9" (33cm) x 12.9" (33cm) x 6.69" (17cm).
